H-frames
Static Mast Structures

Low Profile Structure Offerings

Bus Supports
PT Stands
CCVT Stands
Switch Structures
CAP Sanks
Square Takeoff Bays
Box Structures
Oil Containment Platforms

FORMET

AN **ARCOSA** BRAND

Meyer Substations

Meyer Utility Structures provides an extensive array of pre-engineered substation offerings through partnership with sister company, Formet. For more than twenty years, Formet has supplied rolled shaped substation structures in the United States and Mexico, and eventually expanding production to tapered tubular substation structures.

Quality and reliability of our substation structures is held in the highest regard. Formet has been ISO:9001 certified for twenty years, and is AISC certified*. All substation structure types are prototyped for fit-up proceeding fabrication to ensure accuracy in drawings, production, and assembly. Formet also utilizes certified in-house inspectors for internal inspection and examination of all critical welds of substation structures.

*certification in process
